

Measures and documentation of infection control under COVID -19

Flåm Bilutleie AS follows the guidelines of the authorities regarding COVID -19:

This means, among other things, an even greater focus on the hygiene and cleaning of the buses. Surfaces are washed and disinfected.

The minibuses have been washed down extra after the winter.

Frequent affected areas of the bus will be disinfected by personnel after each trip. Other surfaces in the bus will be cleaned as often as practicable.

In case of driver change, the driver is cleaned / disinfected.

Flåm Bilutleie AS is operating in accordance with the restrictions and regulations of the Norwegian Government's Health Department to reduce risk for infection. The passenger capacity per transport unit and the hygienical measures are based on the national level of action for reduction of contagiousness:

| Level of action | Operation status and capacity | Measures |
|---------------------|---|--|
| Green level | Full operation 100% capacity 16 Pax in minibus 56 Pax in coach | <ol style="list-style-type: none"> 1. Prohibit use of public transportation for sick people. 2. Improved hygiene <ul style="list-style-type: none"> - Good hand- and coughing hygiene - Regular cleaning 3. Contact reducing measures: <ul style="list-style-type: none"> - Avoid unnecessary physical contact to others - 16 Pax in minibus - 56 Pax in coach |
| Yellow level | Intensified cleaning and disinfection and contact reducing measures 75% capacity 13 Pax in minibus 42 Pax in coach | In addition to green level measures: <ol style="list-style-type: none"> 1. Scattered seating of passengers 2. Avoid face- to-face seating/contact 3. 1m distance between passengers is recommended for longer travels (>1h) 4. Crowd distance control in waiting areas |
| Red level | Extended contact reducing measures 50% capacity 7 Pax in minibus 28 Pax in coach | In addition to green and yellow level measures: <ol style="list-style-type: none"> 1. Contact reducing measures: <ul style="list-style-type: none"> - 1m distance between each passenger obligated |

Measures when travelling

The seats that will not be used will be blocked.

At the entrance to the buses, hand disinfection is available to the passengers.

Passengers will also be able to find information / guidance from the FHI authorities

The bus drivers are always informed about the level that applies, making sure our passenger feel safe.

Kind Regards,

Ragnar and Bjørghild
